

BENEFITS OF THE GREETGEO PROJECT

FOR REGIONS AND MUNICIPALITIES

- Better access to specialised expertise
- Stronger project-development capacity
- More credible geothermal project concepts

FOR COMPANIES AND INVESTORS

- New cross-border market opportunities
- Better visibility of the regional project pipeline
- Reduced early-stage uncertainty

FOR THE GEOTHERMAL SECTOR

- Stronger cross-border value chains
- Faster replication of proven solutions
- Greater regional investment readiness

WITHOUT REGIONAL COOPERATION

Knowledge stays fragmented

Similar analyses get repeated

Project developers face the same barriers independently

Local value chains develop slowly

THROUGH GREET GEO

Proven approaches are transferred

Regional actors are connected

Business cases are adapted rather than recreated

Projects move faster towards investment assessment

PROJECT LEGACY

Regional partnerships and stakeholder networks

Business cases ready for further development

Investment models and assessment tools

Financing pathways and action plans

A stronger basis for a connected Pannonian geothermal market

ENABLES

NEXT STEPS

POLICYMAKERS

Align permitting pathways and support cross-border data sharing

CITIES & MUNICIPALITIES

Commission a district-heating or direct-use feasibility study using the project's tools

SMEs & DEVELOPERS

Engage with the business case closest to your value chain and use the investment-assessment framework

INVESTORS

Review the de-risked business cases as a pipeline of near-market opportunities
